

RM-21

Skin cleaning agent | Parts cleaning agent

Benefits

- Cleaning of contaminated skin of persons
- Gentle solution for the human skin (cosmetic product)
- Low viscosity. Easy dosage via automated systems
- Suitable for the cleaning of material

General description

Kärcher Futuretech has developed a whole familie of high efficient agents for cleaning contaminated skin of persons, the RM-21. It is suitable for cleaning the whole body as well as hair. The agent can be applied by means of soap dispenser or injectors of shower systems. RM 21 solutions are gentle and do not harm healthy human skin. The recipe meets the requirements of cosmetics guideline DIN EN ISO 22716.

Suitable for cleaning all metallic, painted or unpainted surfaces as well as parts made of plastic and other materials. Can be used for dewaxing preserved parts and vehicles. Suitable for foam cleaning using a foam nozzle. RM 21 can also be applied by means of heated high-pressure cleaners.
