

MED-ENG®

A BRAND OF THE SAFARILAND GROUP

PERSONAL PROTECTIVE EQUIPMENT TAC 6E

The Med-Eng TAC 6E is a highly versatile lightweight suit that protects public safety and military personnel including tactical teams from threats posed by IEDs and other explosive hazards.

The TAC 6E provides a unique combination of mobility and scalable protection against blast and fragmentation.

Its modular protective components can be added or removed at any point during the mission to form an integrated system that meets specific operational and protective requirements.

TAC 6E allows full facial protection to remain in place when doffing after a respiratory threat mission.

TAC 6E shown with optional Blast Tracker.

MULTI-MISSION PLATFORM

The TAC 6E uses modular and scalable components to enable users to very easily and quickly reconfigure their protection for use in a wide range of missions. Each protective item is ergonomically designed to allow for a full range of motion without physical strain.

COMPLEMENTS A BOMB SUIT

The TAC 6E allows technicians to maintain mobility while offering a degree of protection against blast overpressure and fragmentation. In this context, it does not replace a full scale bomb disposal suit, but rather relieves technicians from having to make an 'all or nothing' choice between a bomb suit or a bullet resistant vest.

EQUIPMENT COMPATIBILITY

The TAC 6E can be worn with a military or law enforcement agency's in-service body armor. For facial protection, Med-Eng offers 8 Visor Systems that easily affix to Tactical helmets, including models that can accommodate a Breathing Apparatus.*

* Contact Med-Eng for details.

1. Full Sleeve 2. Modular Sleeve - Upper Arm 3. Modular Sleeve - Lower Arm 4. Shoulder Protector 5. Cummerbund/ Suspenders 6. Ballistic Shorts 7. Lower Leg Protectors 8. Thigh Protectors - Front & Rear 9. EOD Plate or Demining Plate (optional)
